

Ankush Laxman Wagh

No: 9130387384

Frontend Developer | React.js | TypeScript

Email: alwagh.45@gmail.com

Address: Pune, Maharashtra

Summary:

Frontend Developer with **3+ years of experience building scalable, high-performance web applications** using React.js and modern JavaScript frameworks. Skilled in developing reusable component architectures, **optimizing application performance, and integrating RESTful APIs**. Experienced in state management, responsive **UI development**, and **Agile environments**. Strong focus on clean code, user experience, and production-grade application design.

Technical skills:

- Programming Languages : JavaScript (ES6+), TypeScript
- Frontend : React.js, HTML5, CSS3, Tailwind CSS
- State Management : Redux, Context API, React Context
- Data Fetching : Axios, Fetch API, React Query (TanStack)
- API : RESTful Services, Error Handling, API Optimization
- Unit Testing : React Testing Library
- Concepts : Performance Optimization, Lazy Loading, Code Splitting, Memoization
- Tools : Git, GitHub, Postman, Jira

Professional Experience

Company Name: Vision Techno Services, Pune | Designation: Frontend Developer | Duration: Sep 2022 To Present

- Refactored and optimized **8+ legacy React components**, improving maintainability and reducing code complexity across the application.
- Built scalable and reusable UI components using **React functional components and hooks**, reducing development time by 30%.
- Implemented efficient state management using **Redux and Context API** across complex component hierarchies.
- Integrated 10+ RESTful APIs using **Axios and Fetch API** with proper **error handling, loaders**, and retry mechanisms.
- Improved application performance **using lazy loading, code splitting, and memoization** techniques.
- Wrote unit and integration test cases using **React Testing Library** to ensure reliable feature delivery.
- Collaborated with cross-functional teams (UI/UX + backend) in Agile (Scrum) environment to deliver production-ready features.

Project Domain: Healthcare

Project Name: Healthcare Insurance Management System

- Developed a scalable admin **dashboard for managing insurance policies, claims, and users**.
- Built complex dynamic forms **using React Hook Form and Yup** for validation, improving form reliability and user experience.
- Implemented **full CRUD** operations with optimized API integration and proper state handling.
- Designed reusable UI components including tables, forms, modals, and input controls for better scalability.
- Applied Tailwind CSS for responsive and consistent UI across devices.
- Improved performance by implementing lazy loading and reducing unnecessary re-renders.

Key Achievements

- **Developed 15+ reusable React components**, reducing **development time by 30%**.
- **Collaborated with UI/UX designers** and backend developers to deliver features with **98% accuracy** to design specs.
- Improved **application performance** and **reduced load time using** optimization techniques

Education

- **Bachelor of Engineering (BE)**, in CSE from Sant Gadge Baba Amravati University, **2022 with 71%**

Declaration

I hereby declare that the above-mentioned details are true to the best of my knowledge and belief.
